CONNECT SOLUTIONS

(Formerly Clareti Connect solutions)

Rapid connectivity with intelligent, real-time processing, to regulators, partners, and more

As your business evolves, managing your connectivity becomes more complex.

You need to connect to partners and venues across the financial ecosystem and manage, map and maintain diverse, changing and non-standard data formats both in daily operations and new integration projects.

Your internal and external connectivity requirements are complex and ever-changing.

Gresham's Connect provides financial institutions with fully managed intelligent connectivity, data migration and integration with trading partners, banks, clients, regulators, and other venues across the financial services ecosystem.

Participate in the complex inter-connected global financial system without worrying about integration risk, cost or time to market.

Delivering

Exceptional throughput and performance, as proven by some of the world's largest banks and complex multi-nationals.

Security and compliance with modern, cloud-native technology meeting all relevant standards.

Guaranteed service levels and 24/7/365 availability.

Trusted partnership with a proven partner invested in your success.

The Connect difference

- + **A single, managed, always-on solution** to take on all data connectivity requirements, map and transform all messaging formats, and support both standard and non-standard data.
- + **Over 350 pre-built, ready-to go standards**, transformations, adapters, and libraries, continuously maintained and updated.
- + **Intelligent, real time, reliable STP**, ensuring your validated data is sent to the right destination, at the right time, without manual intervention.
- + **Custom connectors and adaptors**, built quickly and easily based on our decades of experience in financial integration.

The trusted solution for complex, real-time connectivity.

Gresham

Flexible deployment: choose what's right for your business

Connect is available as a standalone domain-specific deployment, or as part of applications packages that enable you to connect, reconcile and control your data, end-to-end. A fully managed service option takes the pain out of evolving data integrity and control requirements across your entire business..

Expert solutions across specialist domains

Our Connect solutions support businesses across four critical domains:

- + Connect for regulatory:**
(Formerly Clareti Connect regulatory services)
Complete managed regulatory reporting service for data connectivity, migration and integration.
- + Connect for stp:**
(Formerly Clareti Connect stp services)
Supporting intelligent, real-time automation and intelligent stp requirements across the entire trade lifecycle.
- + Connect for payments:**
(Formerly Clareti Connect payment services)
A comprehensive managed service for message transformation, multi-banking, cash and payments.
- + Connect for message services:**
(Formerly Clareti Connect message services)
Complete managed solution for acquiring, formatting and producing data standards based messages including FIX, FPML and ISO20022 and many others.

Powered by the Clareti platform

A modern, purpose-built, data integrity and control platform designed by industry experts, the Clareti platform is built for a cloud-native environment by technology leaders with decades of industry experience. It brings data confidence to organisations around the world and has been successfully adopted across banking, investment and wealth management firms, insurance, and by complex multi-nationals.

Deployed in your cloud, their cloud, our cloud, or on-premise – we know how important flexibility is, it's always up to you.
