# Clareti Analytics

## Actionable data insights - at the speed of the financial markets

Data is the life force of the financial markets, but for too many organisations, getting access to the information that matters, is a drawn out, expensive process.

Too often, a lack of visibility and painstaking reporting processes hamper quick decisions, meaning patterns are missed, while risks and discrepancies within control frameworks are hidden from view.

Front line users have to rely on pressurised internal IT resources to help release the data they need, creating further bottlenecks and losing any potential for real-time reaction.

## Clareti Analytics: At a glance

- Real-time information in a user-friendly interface
- Empowers business executives to leverage value of their data
- Removes the need to generate batch reports
- Viewable on tablets, phones and desktop
- Available for on-premise or cloud deployment
- Tightly integrated into the Clareti platform
- Fully governed secure data access

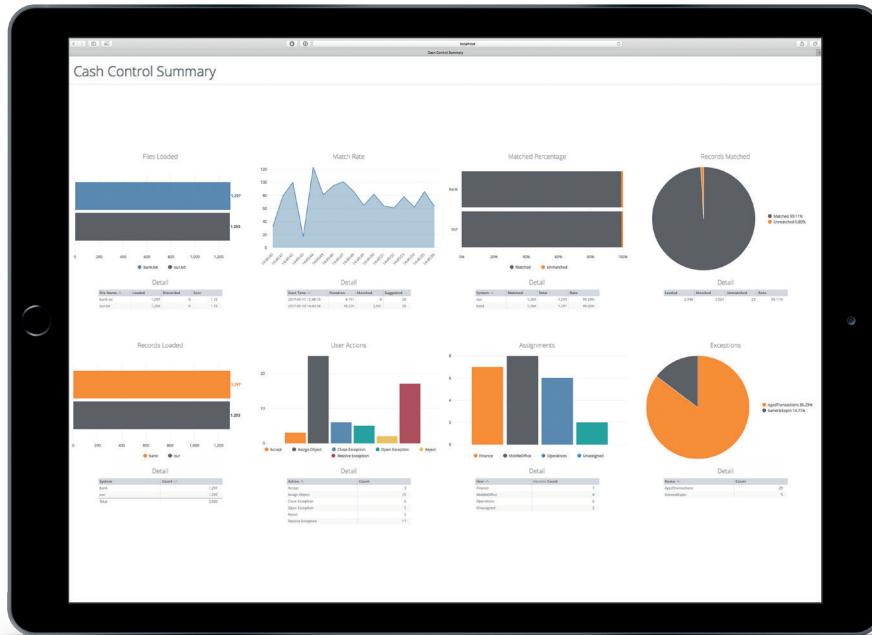

# Remove the uncertainty and delays associated with manual matching

Clareti Analytics is a real-time data visualisation and embedded analytics tool that empowers operational users and executive managers to explore their data and develop valuable business insights.

Integrated with Gresham's market leading data reconciliation technology, Clareti Transaction Control (CTC), users can identify trends, monitor data integrity and control, and track any issues at a glance, via an intuitive dashboard interface. Attractive, dynamic reports can be produced and distributed within seconds, then viewed from any location, on any device.

Data control actions can be initiated directly and quickly from the visualisation within the tool, removing the need for IT involvement and accelerating deployment.

For the first time, executives can spend their time leveraging the value in their data, instead of trying to understand it.

Clareti Analytics Dashboard

# Why do financial businesses use Clareti Analytics?

Clareti Analytics empowers operational users to discover and leverage powerful data insights:

## Real-time information

- Reveals trends at the speed of the financial markets
- Users can monitor controls within CTC and track risks or discrepancies as they occur

## Easy to use

- Intuitive, customisable dashboard interface
- Reveals trends at the speed of the financial markets

## Dynamic reports

- Generates attractive reports in preferred formats in seconds
- Removed the need to generate batch reports

## Superior governance

- Tightly integrated into the industry-leading Clareti platform
- Fully governed, secure data access

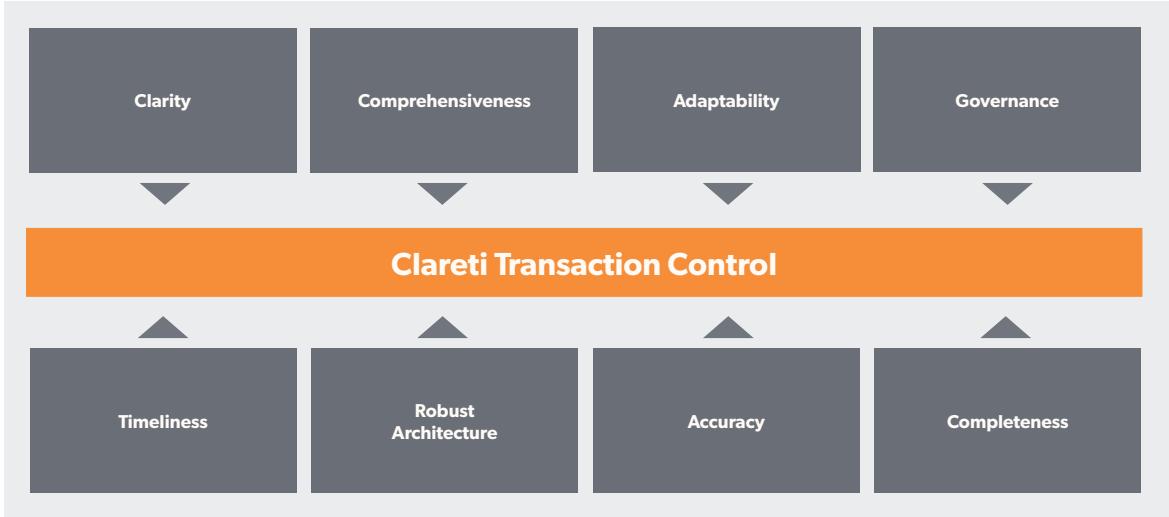

## Lowers IT reliance

- Designed for front-office, business users
- Available for on-premise or cloud deployment

# The elements of integrity

Clareti has data integrity baked into the platform, encompassing all the elements that matter to financial services.

# How Clareti Analytics works

Using a browser-based, dashboard interface users can create dynamic visualisations of the information that matters most to them. Attractive reports can be produced and distributed in a variety of formats, within seconds, and read on the move via tablet and mobile, as well as desktop.

Clareti Analytics Dashboard

## Trusted by finance businesses throughout the world

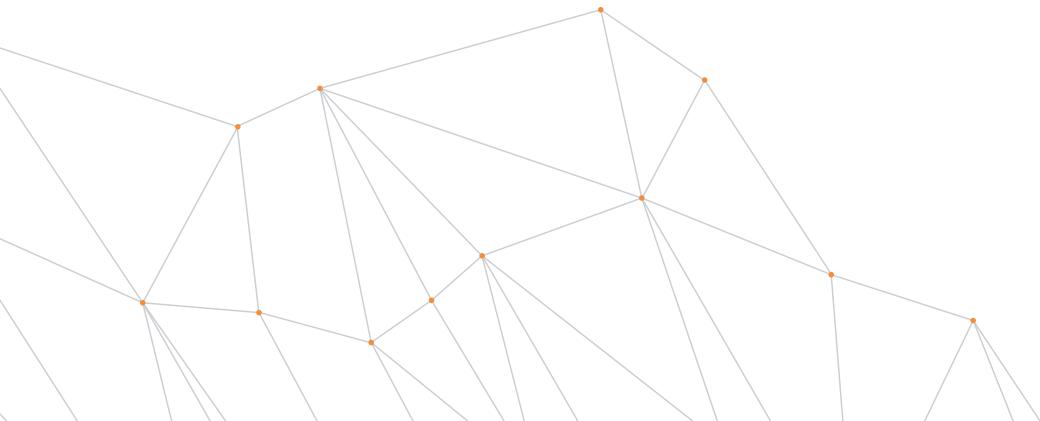

Clareti Analytics is just one in a series of innovations launched by Gresham to make managing, controlling and understanding data easy. Complementing the flagship Clareti Transaction Control (CTC), the industry-leading matching and reconciliation solution renowned for its agility and speed of deployment, Clareti Analytics joins a stable of intuitive products designed with the user in mind.

## About Gresham

Gresham's award-winning Clareti platform has been designed to provide financial institutions with complete certainty in their data processing. Clareti is a highly flexible and fully scalable platform for assuring enterprise data integrity and is designed to address today's most challenging financial control.

Gresham's portfolio of applications based on the Clareti platform, including Clareti Transaction Control (CTC), Clareti Accounts Receivable Management (Clareti ARM) and Clareti 24 Integration Objects, provide innovative industry and domain specific solutions for real-time data management based on business-driven controls.

Gresham Technologies plc is a leading software and services company that specialises in providing real-time transaction control and enterprise data integrity solutions. Listed on the main market of the London Stock Exchange (GHT.L) and headquartered in the City of London, customers include some of the world's largest financial institutions, all of whom are served locally from offices located in Europe, North America and Asia Pacific.
